History AutoCAD 1.0 was initially written by MapInfo Corporation for version 6.5 of the MapInfo Professional GIS software. It was later ported to AutoCAD and was also used as the basis for CadGuide by CadTech, and AutoCAD Map by MapInfo Corporation. The AutoCAD 2.0 release date was May 10, 1990. AutoCAD 2004 was initially released as "AutoCAD", referring to its non-Geographic Information Systems (GIS) functionality. The release of AutoCAD 2004 also brought with it significant changes to the AutoCAD User Interface. At the time of the release, it was referred to as a "Next Generation User Interface". Later, in 2005, AutoCAD was renamed as "AutoCAD LT" because the software was now free of charge and supported by Autodesk and available to the public without any charge to users. Also, AutoCAD LT 2003 was released as "AutoCAD LT" and not just as "AutoCAD" which had always been the name. At the end of 2007, CadTech, the third-party developer of AutoCAD Map, was sold to Colowind, a French company, and the CadTech name was transferred to the Autodesk group. In 2008, Autodesk announced the discontinuation of the AutoCAD LT product line, which had been the only previous version of AutoCAD that was available as a free download (distributed as an update to original AutoCAD releases). On August 30, 2008, AutoCAD LT 2007 was released as the last version of AutoCAD LT for Microsoft Windows. AutoCAD LT 2010 was the first version of AutoCAD LT to be released under the version numbering scheme that started with '10' instead of 'LT'. It was also the first version of AutoCAD LT to be distributed as a stand-alone installer instead of an.msi installer. AutoCAD 2010, the first version of the modern AutoCAD, was released in January 2010. It supported legacy AutoCAD applications, but introduced a new version numbering system for the product, with the 2009 numbering system being renamed to 2010. AutoCAD 2011 introduced many significant changes to the AutoCAD user interface and is the first AutoCAD release to feature AutoCAD web app in the Internet Explorer version of AutoCAD. AutoCAD 2012 introduced many significant
