## **BMP2AVI [April-2022]**

Key Macro Description: In a word, the BMP2AVI is a small-sized and portable application that enables you to convert BMP images into AVI clips after specifying the frame rate. It doesn't include complicated options or configuration parameters, making it accessible to all types of users, even the ones inexperienced with image and video processing tools. Easily convert BMP to AVI BMP2AVI adopts a user-friendly interface made from a small window with a plain and simple structure, where you can resort to the file browser to locate and open a BMP image from a local, network or removable drive. After indicating the output directory and name of the new AVI file, you can establish the frame rate (default is 10fps), and proceed with the task with the click of a button. A notification message is displayed at the end to let you know whether or not the job was successful. There are no other notable options provided by this software tool. Portable application The entire program's wrapped in a single.exe file that can be saved anywhere on the disk or copied to a USB flash drive, in order to seamlessly run it on any PC without setup. It doesn't modify system registry settings, create files on the disk, or need DLLs or other components to work properly. Evaluation and conclusion It didn't put a strain on the computer's performance in our tests, running on a low amount of CPU and RAM. On the other hand, it displayed an error dialog in a couple of cases when attempting to create the AVI file, informing us that it cannot build the graph. We must also keep in mind that BMP2AVI hasn't received updates for a long time and likely has compatibility issues with newer Windows editions. Nevertheless, you can test it for yourself if you're looking to generate AVI videos from common image files with the BMP extension. Installation Using Windows Download and run the.exe file. In the first step, you need to specify the output path and name of the new AVI file. Step 2: Select the frame rate for the video clip and click the Convert button. Using Linux Download and run the.run file. In the first step, you need to specify the output path and name of the new AVI file. Step 2: Select the frame rate for the 1d6a3396d6

---
