And it works fine on my PC (win 7), but when I try to open it on my Android device, the app crashes. What could be the problem? Note: I have both the source code and the compiled apk file, but I can't post them here because my account is not a registered developer. I need someone to help me with this problem. A: I believe the problem might be caused by the wrong signature of the apk. 1) AndroidManifest.xml
